AB The present invention provides nucleic acid and polypeptide sequences describing a novel isoenzyme of the **cyclooxygenase** enzyme, herein named as **human cyclooxygenase-3 (COX-3)**. Cloning of cDNA encoding the N-terminus of **human COX-3** is described and the full-length cDNA and encoded amino acid sequences of the COX splicing variants, **COX-3a** and **COX-3b**, are provided. The isolated nucleic acid or polypeptide mol. of the invention can be used in detection assays, gene therapy, and screening assays.
